

MVC Middleware

BY LOGHMAN AVAND

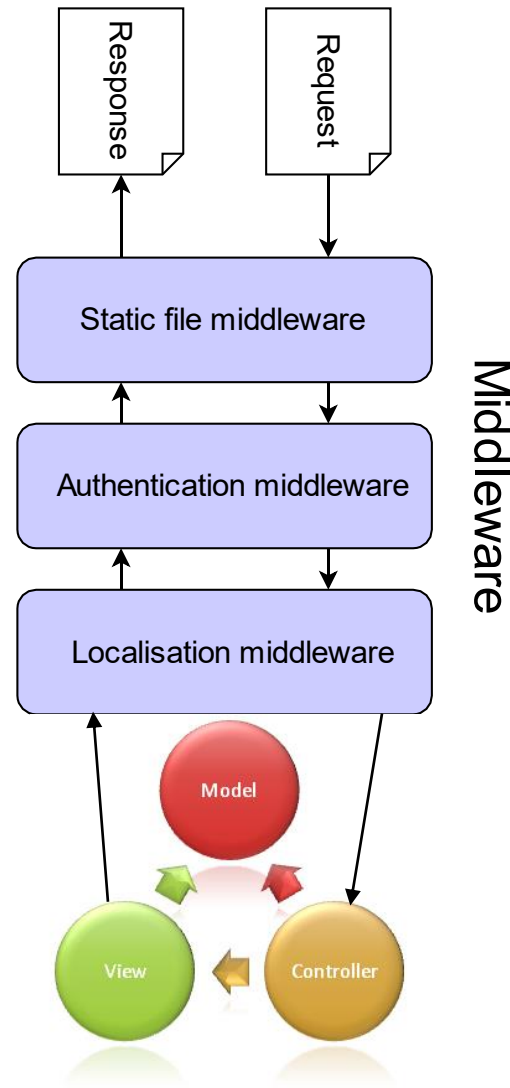

Middleware

7Learn.com Server

Middleware

The request is either returned by the middleware or passed to the next one until a response is sent back.

Middleware in Code

IEBlockerMiddleware.php 305 Bytes

```
1 <?php
2 namespace App\Middleware;
3 use App\Core\Request;
4
5 class IEBlockerMiddleware extends BaseMiddleware {
6     public function handle(Request $request){
7         if(strpos($request->agent,'Trident/7.0') !== false){
8             echo "Sorry. IE was Blocked ! haha ...";
9             die();
10        }
11    }
12 }
13 }
```
