

# جاوا اسکریپت سطح متوسط

مدرس: مهرداد دادخواه

- `classList`
- `elem.classList.add/remove("class")`
- `elem.classList.toggle("class")`
- `elem.classList.contains("class")`

The `style` property operates only on the value of the "style" attribute, without any CSS cascade

- `elem.style.*`
- `elem.style.cssText`
- `getComputedStyle(element, [pseudo])`
